Profile

A passionate technologist with a broad skill set, I create bespoke experiences on the web. I have extensive experience with HTML, CSS, Javascript and modern frameworks and libraries, but I believe my true strength as a developer lies in my ability to solve complex problems, learn new technologies quickly, and collaborate with teammembers, clients and managers. I strive to be a champion for a thriving, accessible and inclulsive internet and an active memeber of the New York City developer community. He/Him.

Experience

Open Source Web Developer
